OIA-2022-4582

20th January 2023

[Redacted]
[Redacted]@stuff.co.nz

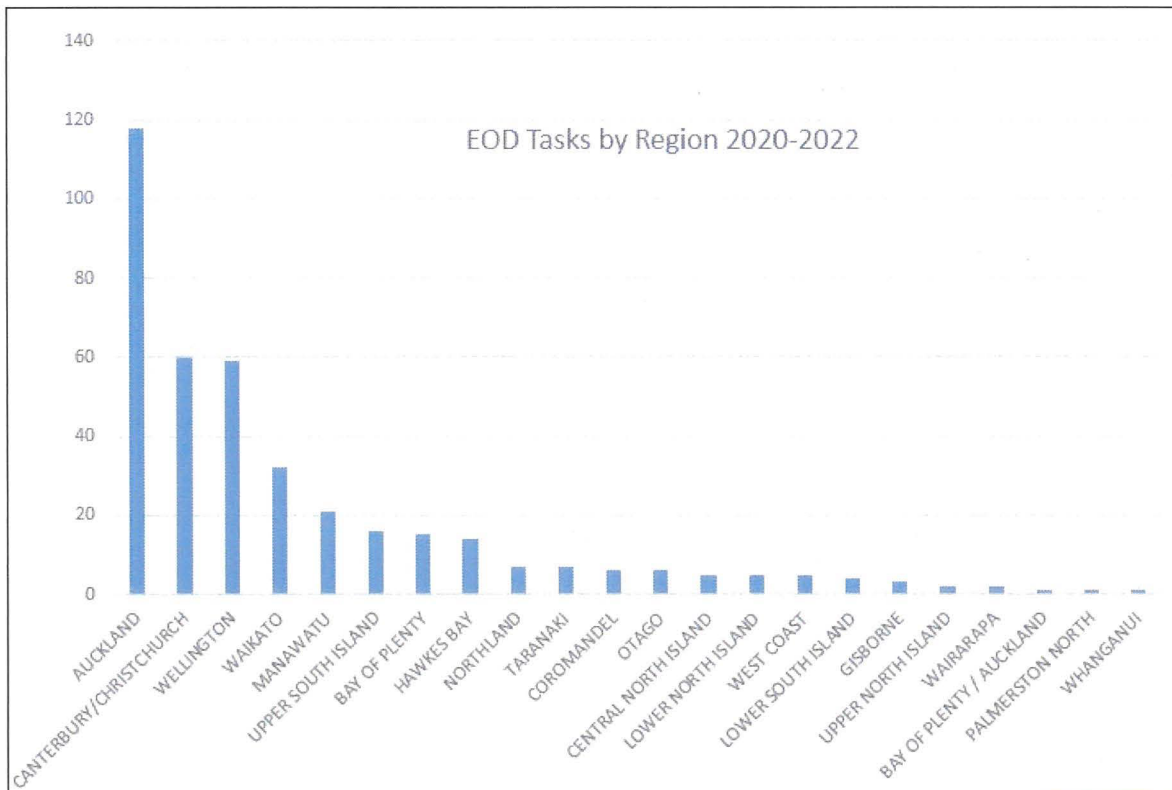

Dear [Redacted]

I refer to your email of 2 December 2022 requesting, under the Official Information Act 1982 (OIA), the following:

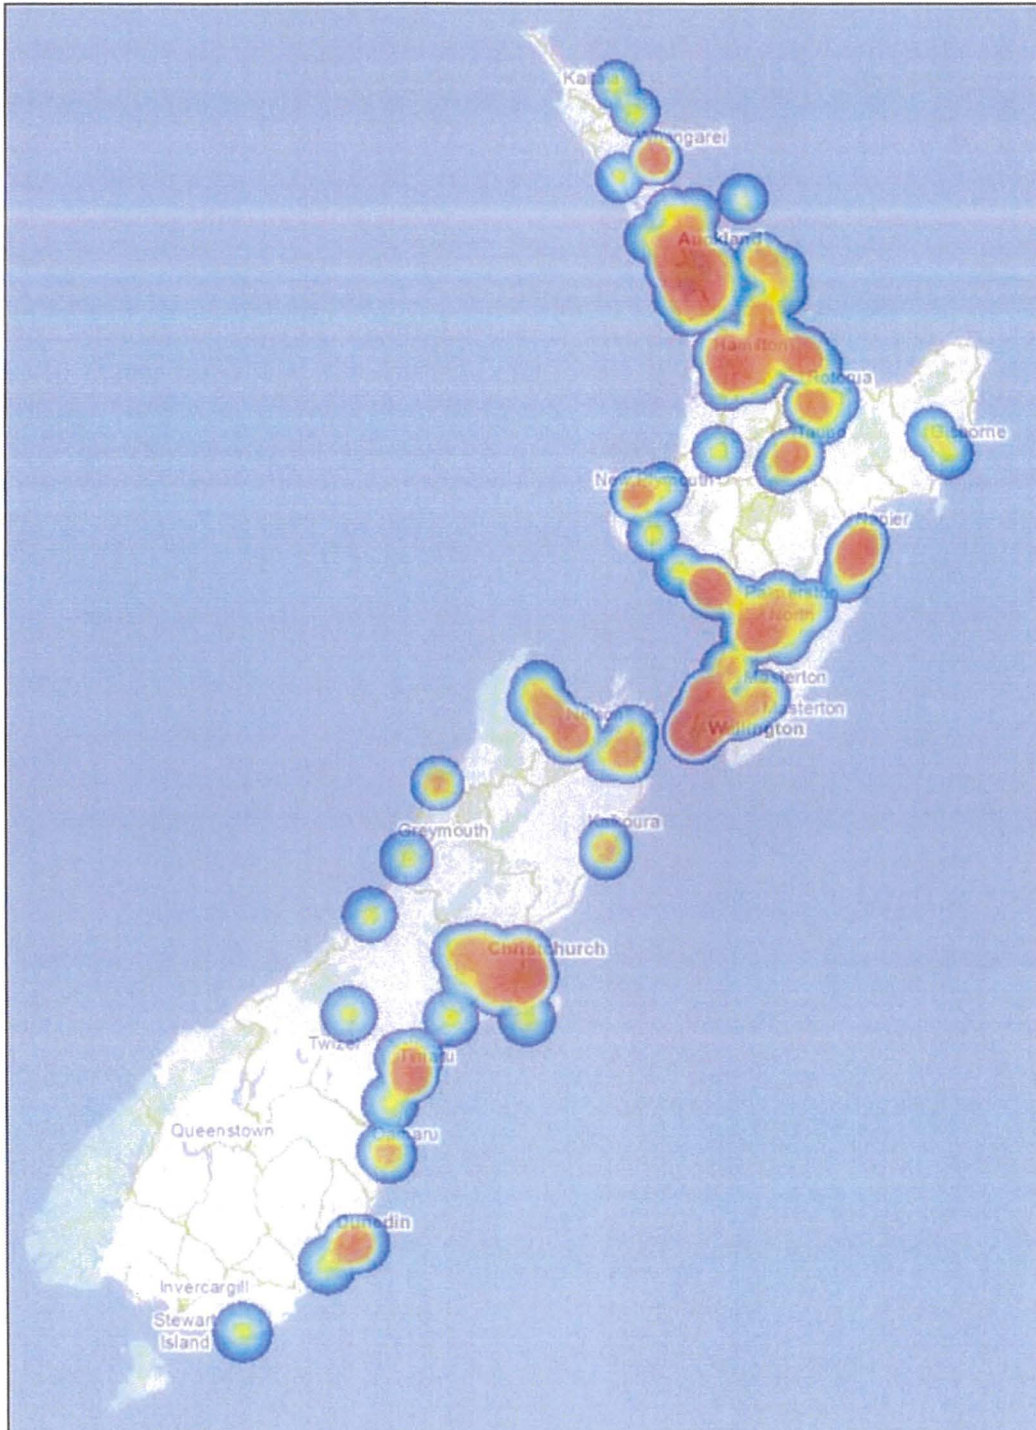

- A list of all instances of when the Defence Force explosive ordnance disposal team has been called for in the past three years.
- Can this have when and where each instance was, what the incident was and what action was taken.

The New Zealand Defence Force (NZDF) maintains an Explosive Ordnance Disposal (EOD) capability with personnel throughout New Zealand. EOD capability is based in Auckland, Wellington and Christchurch

From 1 January 2020 to 31 December 2022, the NZDF EOD team undertook 391 operational tasks in New Zealand. The below table shows how NZDF EOD callouts were distributed by region over that time followed by an associated 'heat map'.

NZDF EOD Tasks 2020 – 2022 Timeline

EOD Tasks 2020-2022 Heat map

Also enclosed is information regarding: callouts for items containing Chemical, Biological, Radiological, or Explosive items (CBRE); callouts for Improvised Explosive Device Disposal (IEDD); and callouts for Conventional Munitions Disposal (CMD).

Details about explosives or chemicals used in explosive devices encountered by the NZDF in EOD callouts, and the render safe procedures, are withheld in accordance with sections 6(a) and 6(d) of the OIA, as making this information available would likely prejudice the security or defence of New Zealand, and endanger individual safety.

You have the right, under section 28(3) of that OIA, to ask an Ombudsman to review this response to your request. Information about how to make a complaint is available at www.ombudsman.parliament.nz or freephone 0800 802 602.

Responses to official information requests are proactively released where possible. This response to your request will be published shortly on the NZDF website, with your personal information removed.

Yours sincerely

PP

AJ WOODS
Air Commodore
Chief of Staff HQNZDF

Enclosures:

1. NZDF callouts CBRE
2. NZDF callouts IEDD
3. NZDF callouts CMD
